NUTRITION LESSON 5

ALCOHOL.

How to enjoy a drink and still get results.

7 CALORIES PER GRAM.

Remember this from the Calories lesson? Alcohol is almost as high as fat, and nearly double protein and carbs.

PROTEIN 4 per gram

CARBS 4 per gram

ALCOHOL 7 per gram

FAT 9 per gram

GOOD NEWS

You don't have to give up drinking. You can fit it into your calories. It just helps to know how it can hold you back, and how to plan for it.

HOW IT HOLDS YOU BACK.

YOU MOVE LESS

Hungover on the sofa all day means your NEAT drops.

DRINKS ADD UP

Pick the wrong drinks and you can go over your calories fast.

WILLPOWER GOES

A few drinks in and the takeaway at the end of the night feels like a great idea.

WORSE SLEEP

You might fall asleep fast, but the sleep you get is poorer.

LESS MUSCLE

Lots of drinking can lower testosterone, a hormone that helps you build and keep muscle.

KNOW YOUR DRINKS.

Roughly how many calories in one:

 Gin and slimline tonic	60
 Vodka and Diet Coke	100
 Whisky and Diet Coke	100
 Bottle of lager, like Corona	150
 Sugary alcopop, like WKD	200+
 Pint of beer	250+
 Large glass of wine	250+

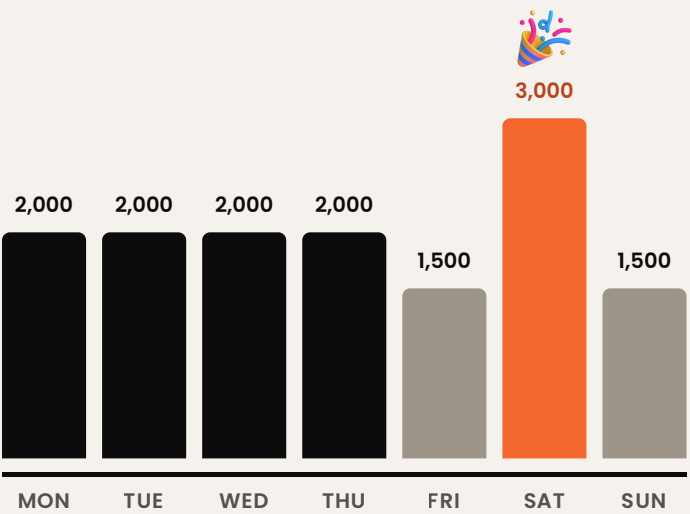

Best pick: a clear spirit with a diet mixer. We're big fans of a gin and slimline tonic.

WHY THIS MATTERS

Four pints on a night out is about 1,000 calories. Do that twice a week and it's 2,000, more than half of the 3,500 you need to lose a pound.

CALORIE BORROWING.

Same person as before. To lose fat she eats 2,000 a day. She has a night out on Saturday, so she eats 500 less on Friday and Sunday.

NORMAL WEEK	BORROWING WEEK
14,000	14,000

BORROW, DON'T ADD

She gets 1,000 extra to enjoy on Saturday, and her week still adds up the same. So she still loses fat. Only found out on the day? Borrow from the days after instead.

HOW TO TRACK IT.

1 LOG IT LIKE FOOD

Search for your drink in Nutracheck or MyFitnessPal. The most common one comes up first.

2 TAKE IT FROM CARBS AND FAT

Eat less carbs, fat or both that day to make room for the drinks.

3 LEAVE PROTEIN ALONE

Keep your protein high. It protects your muscle and keeps you full.

WHAT THAT LOOKS LIKE

NORMAL DAY

DRINKS DAY

REMEMBER THIS.

1 PICK LOWER CALORIE DRINKS

A clear spirit with a diet mixer.

2 BORROW, DON'T ADD

Eat less around a night out.

3 TRACK IT, KEEP PROTEIN

Take drinks from carbs and fat.

Any questions? Ask one of the coaches in the gym, or post in the members group on Facebook. We'd love to help.
