

NUTRITION LESSON 9

PROTEIN.

What it does, why you need more of it, and where to find it.

BUILDING BLOCKS.

Protein is made of small building blocks called amino acids. Your body uses them to build and repair itself.

Calories decide whether you lose weight. Protein helps decide **what** you lose. You want to lose fat, not muscle.

❌ **NOT ENOUGH PROTEIN**
You lose fat and muscle

✅ **ENOUGH PROTEIN**
You lose fat and keep your muscle

PROTEIN, CARBS AND FATS

These are your three macros. Getting the balance right helps you lose fat, keep muscle, have energy and recover from training.

TWO BIG JOBS.

KEEPS YOU FULL

Protein keeps you fuller for longer than carbs or fat. So you're less likely to snack, and sticking to your calories feels easier.

BUILDS AND REPAIRS MUSCLE

Training breaks your muscles down a little. Protein repairs them so they grow back stronger. It also helps you keep muscle while you lose fat.

MORE THAN THE MINIMUM.

Most people don't eat enough protein.

GOVERNMENT GUIDE

The **minimum** to stay healthy. Not the best amount for you.

YOUR BODYSCULPT TARGET

Higher, to help you train, recover and keep your muscle.

EASY WAYS TO ADD MORE

- Eggs with your breakfast
- Greek yogurt instead of normal yogurt
- A protein shake as a snack
- Tuna or chicken on your salad

FIND YOUR TARGET

Your daily protein target is on the Nutrition tab in Trainerize. Try to get as close to it as you can every day.

“WON'T IT HURT MY KIDNEYS?”

NO.

Not at the amounts we suggest.

In studies, people ate double the protein we advise every day for a full year. No harm was found.

ONE EXCEPTION

If you already have a kidney problem, check with your GP before you increase your protein.

GOOD SOURCES.

Add some of these to every meal:

Chicken and turkey

Fish

Tinned tuna

Eggs

Greek yogurt

Protein powder

VEGAN

Beans, lentils and tofu

VEGAN

Pea, rice or hemp powder

MAKING IT EASY

The Meal Planning lesson shows you how to split your protein across your meals so you hit your target.

REMEMBER THIS.

1 PROTEIN KEEPS YOU FULL

And protects your muscle.

2 AIM FOR YOUR TARGET

It's on the Nutrition tab in Trainerize.

3 PROTEIN IN EVERY MEAL

Meat, fish, eggs, yogurt or beans.

Any questions? Ask one of the coaches in the gym, or post in the members group on Facebook. We'd love to help.
