BODYSCULPT

YOUR NUTRACHECK GUIDE.

Set it up once, then log your food in seconds.

START HERE

TRACKING IS EASY.

You set Nutracheck up once. After that, it's three things.

1

SCAN IT

Scan the barcode on what you're eating.

2

WEIGH IT

Tell the app how much you had. Grams is best.

3

LOG IT

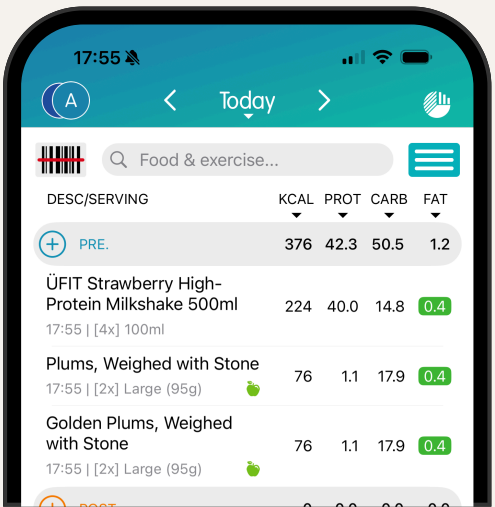

Do it as you go and it takes seconds.

That's tracking. It doesn't need to be perfect, it just needs to be honest. Everything after Step 3 in this guide is a bonus.

STEP 1

GET SET UP.

1. Download **Nutracheck** from the App Store (iPhone) or Google Play (Samsung and Android).
2. Create your account. It'll ask a few questions about you and your goal.
3. Answer them, but don't worry about the calories it gives you. You'll swap them for ours next.
4. The one that does matter is your weight. Weigh yourself first thing in the morning, after the loo and before you eat, and use that.

STEP 2

YOUR CALORIE TARGET.

The app will give you its own target. Ignore it.

USE OURS.

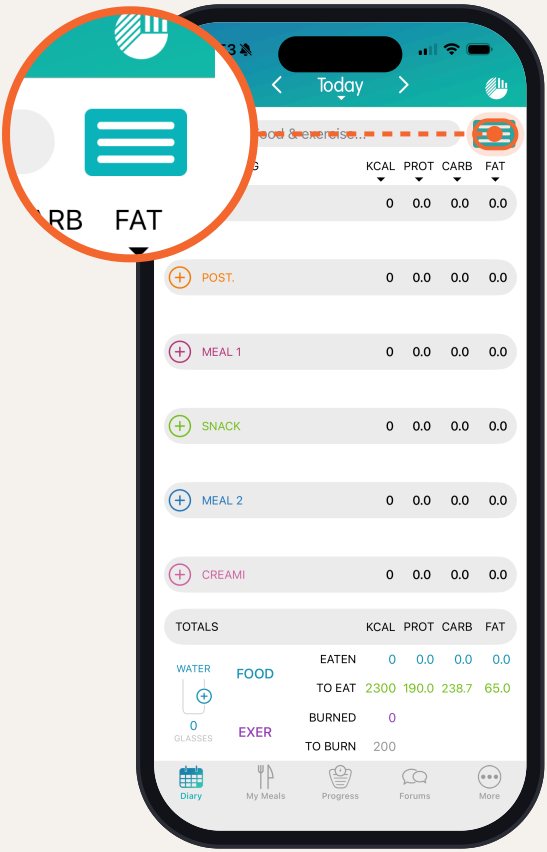

We've set your calorie and protein targets for you. They're on the **Nutrition tab** in the **Trainerize app**. Have them in front of you for the next few steps.

STEP 2

PUT IN YOUR TARGET.

Open the **Nutrition tab** in Trainerize so your targets from us are ready. Then:

1 In your diary, tap the **blue menu button** to the right of the search bar.

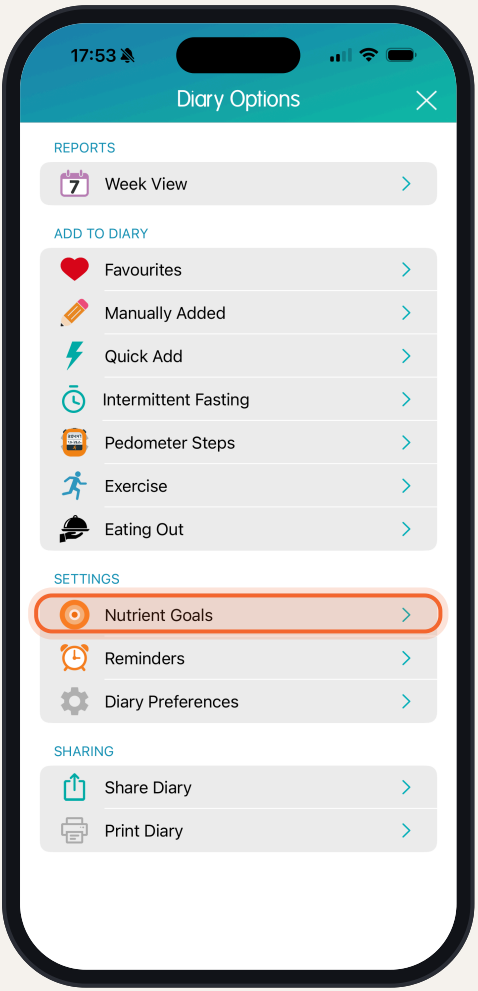

STEP 2

PUT IN YOUR TARGET.

2 Go to your goals.

Nutrient Goals › **Set My Own Goal**

STEP 2

PUT IN YOUR TARGET.

2 Then tap **Set My Own Goal**.

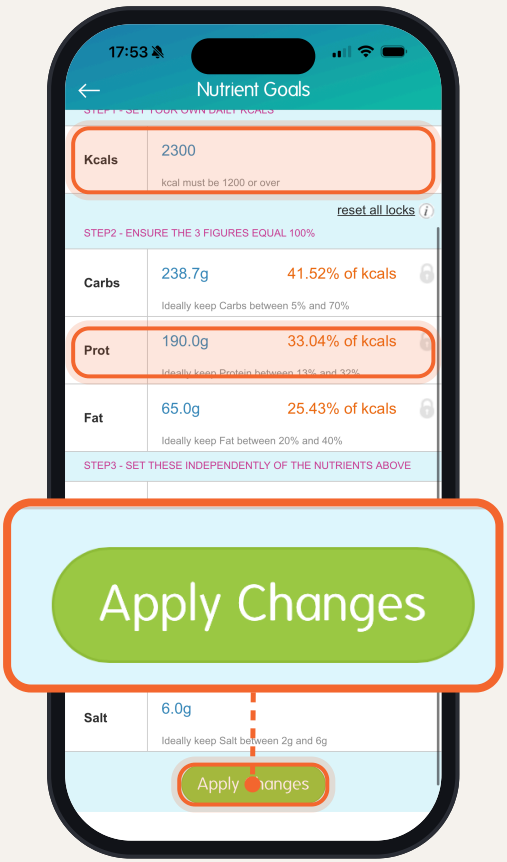

STEP 2

PUT IN YOUR TARGET.

3 Tap the calorie number and type in the calorie target from Trainerize. If you can set protein there too, put in your protein target.

4 Scroll down and tap **Apply Changes**.

STEP 2

WATCH OUT FOR "+ EXERCISE".

If you link a fitness tracker, Nutracheck adds the calories you burn onto your allowance.

TURN THAT OFF, OR IGNORE IT.

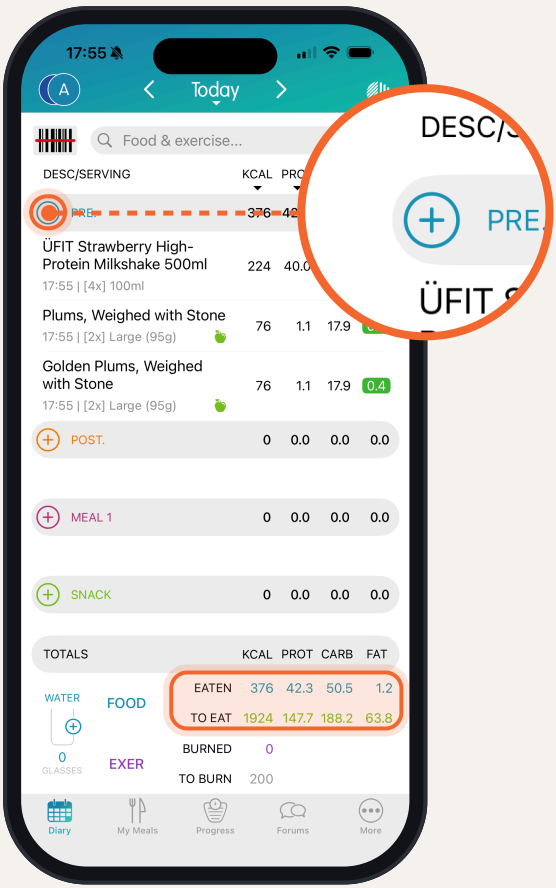

Your target already allows for your steps and your sessions with us.

STEP 3

LOG YOUR FOOD.

Your diary shows each meal, your total for the day, and how many calories you've got left.

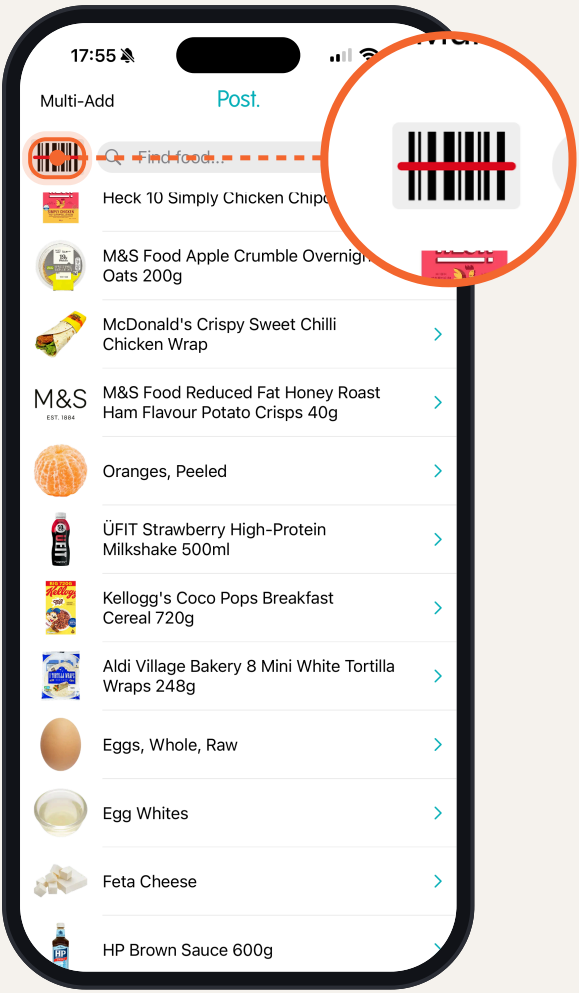

1. Pick the meal and add a food.

STEP 3

LOG YOUR FOOD.

2 **Scan the barcode** if it's got one. It's the quickest and most accurate way.

STEP 3

LOG YOUR FOOD.

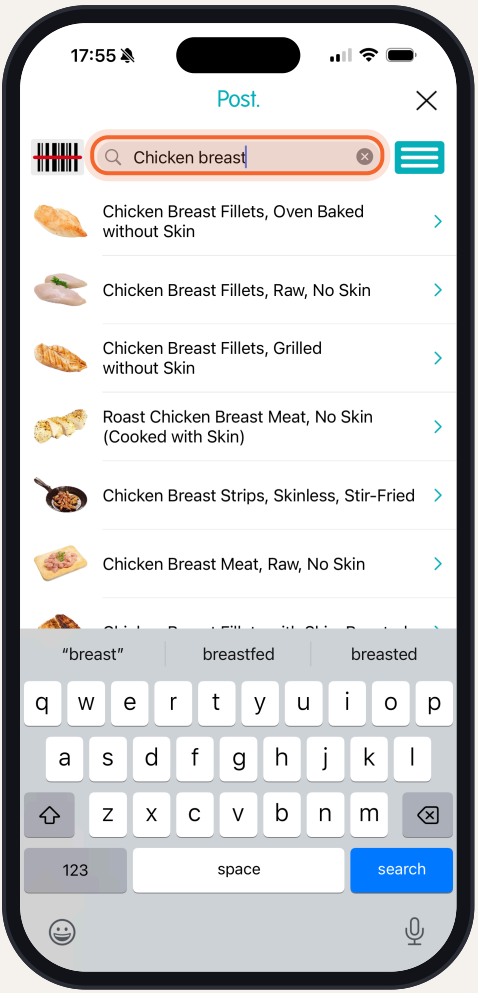

Hold the barcode inside the corners and it'll find the food for you.

STEP 3

LOG YOUR FOOD.

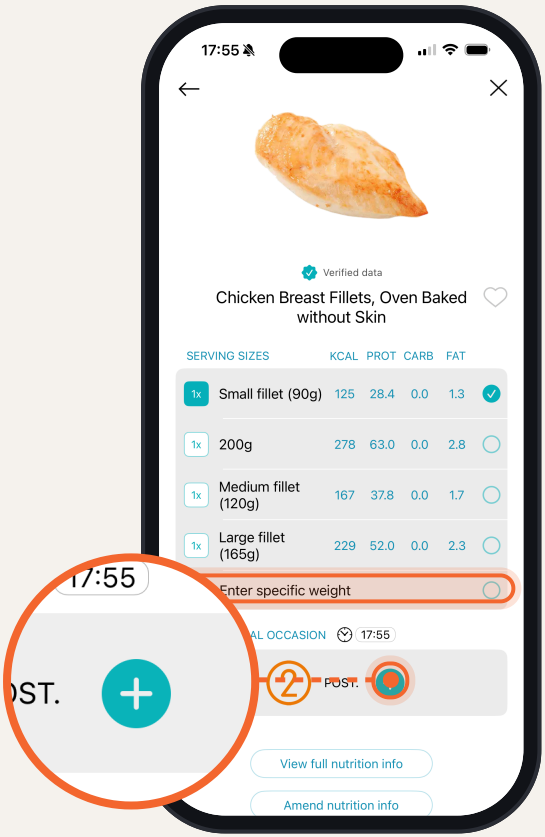

3 No barcode? **Search** for it. Be specific about the brand, and whether it's raw or cooked.

STEP 3

LOG YOUR FOOD.

4 Set how much you had (grams is best) and add it.

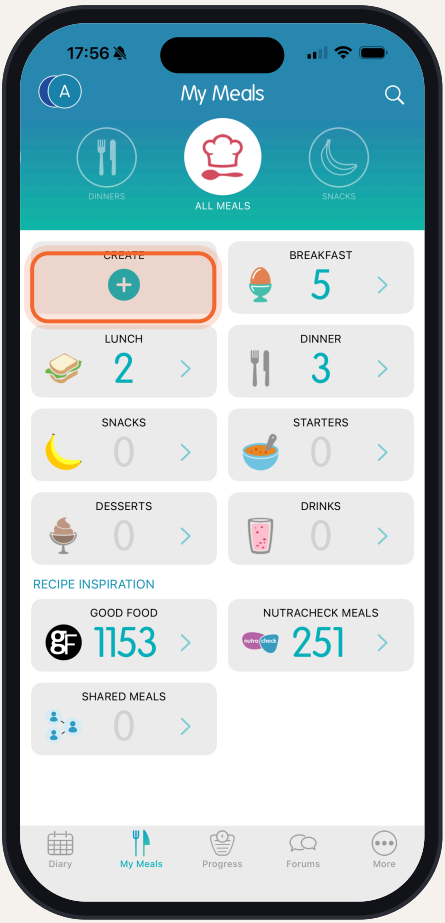

Foods you've had before are saved for you. Start typing the name and Nutracheck suggests it, so you don't have to scan every time.

SAVE TIME

SHORTCUTS.

MY MEALS

Have the same meals a lot? Go to **My Meals**, tap **+**, name it, add what goes in it, and save. Next time it's one tap.

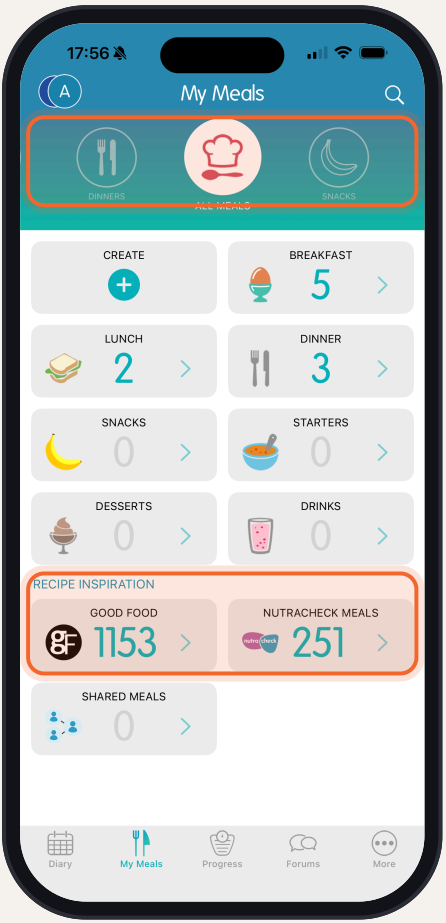

SAVE TIME

SHORTCUTS.

READY-MADE RECIPES

My Meals also has recipes already in it. Swipe across the top to look through them, or tap **Recipe Inspiration**.

MORE SHORTCUTS.

EATING OUT

The **Eating Out** section has coffee shops, fast food and takeaway menus. Look it up before you go so you can plan the rest of your day.

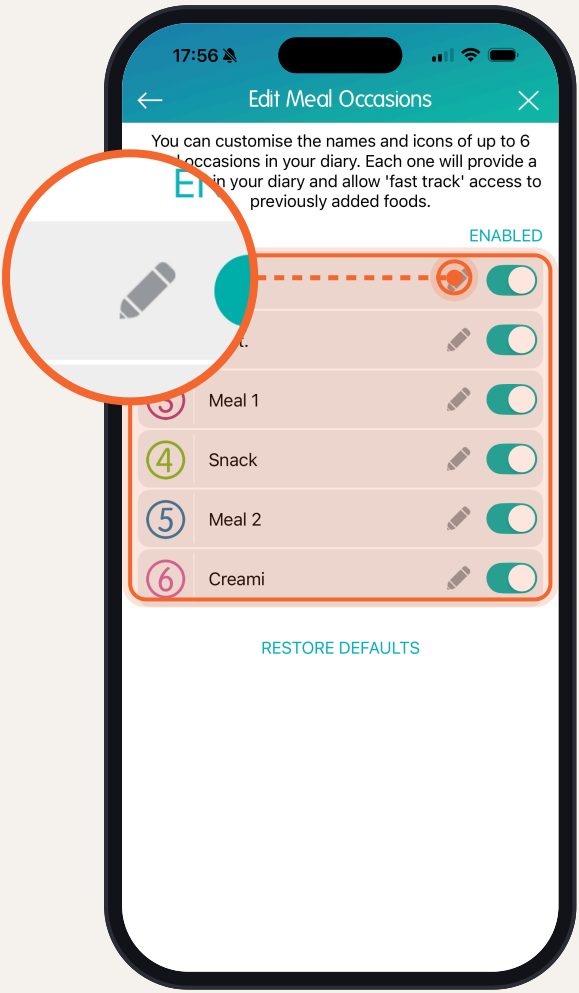

SAVE TIME

MORE SHORTCUTS.

DIARY SETTINGS

You can rename meals and add extra ones, like "Snack 2", in the diary preferences.

RECIPES

YOUR OWN RECIPES.

Cooking for the family? Batch cooking for the week? Put the recipe in once and Nutracheck works out the calories in each portion.

WEIGH IT BEFORE YOU COOK IT

Weigh your ingredients raw, then add the full amount that goes in the pot.

COUNT THE PORTIONS

Tell it how many servings the whole pot makes. If it feeds four, that's 4 servings.

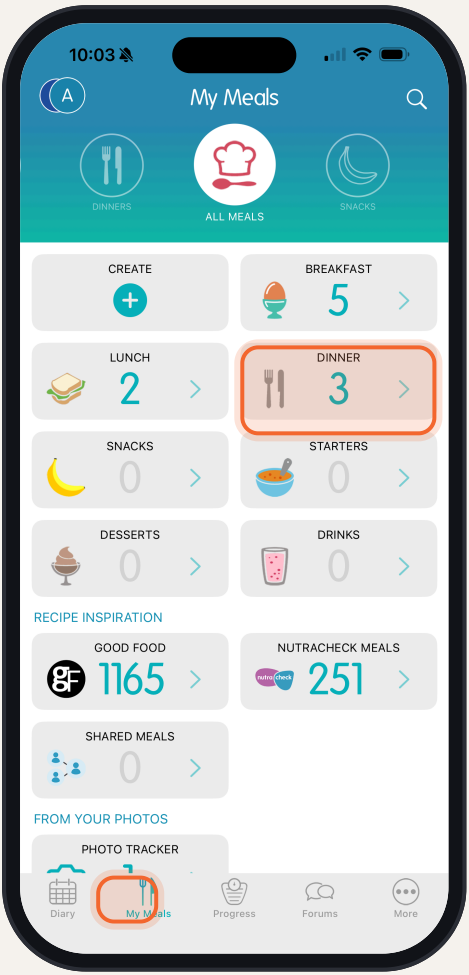

LOG ONE SERVING

Next time you have it, your recipe is saved. Log one serving and you're done.

START A RECIPE.

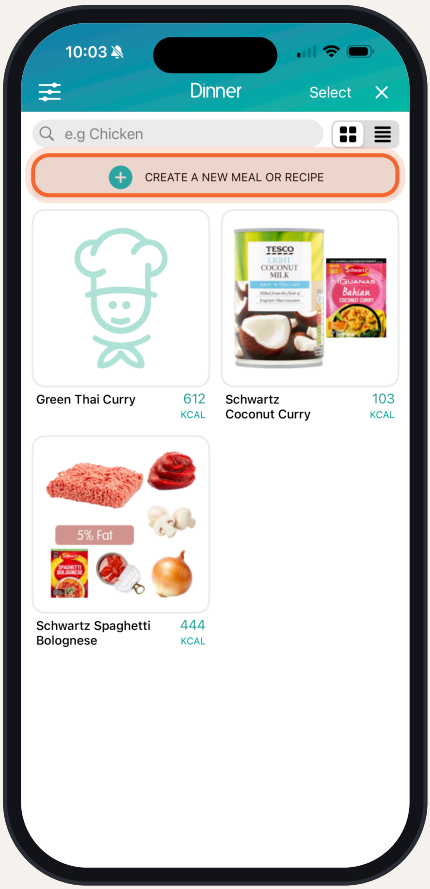

1. Tap **My Meals** at the bottom of the screen.

2. Tap the meal it's for, like **Dinner**.

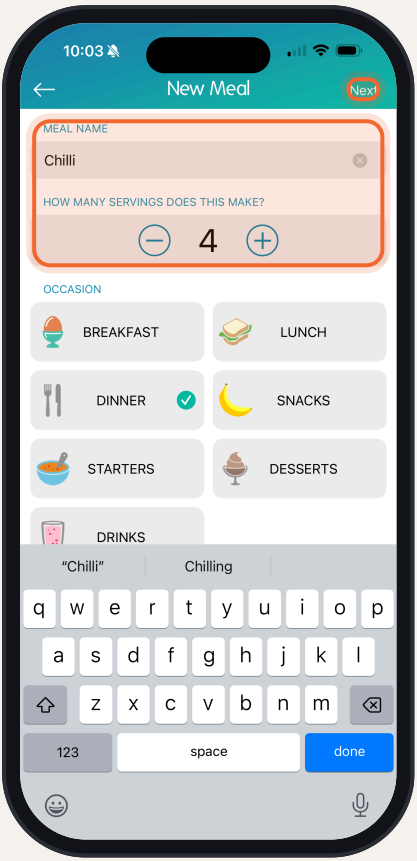

CREATE A RECIPE.

3 Tap **Create a new meal or recipe**.

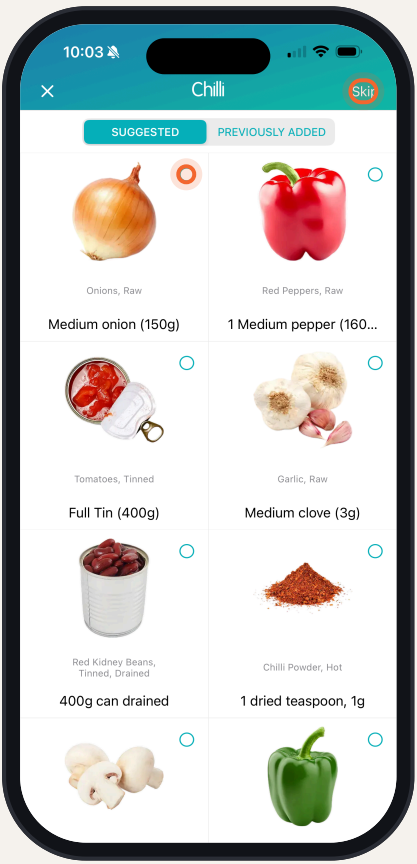

NAME IT.

4 Type the name and use the **+** and **-** to set how many servings it makes. Check the meal is ticked, then tap **Next**.

ADD YOUR INGREDIENTS.

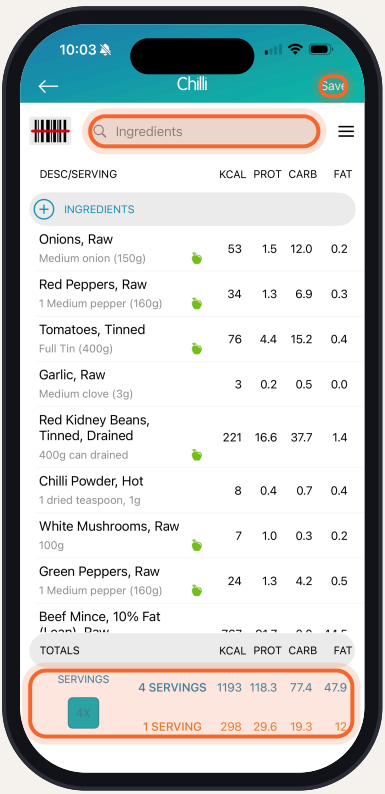

5 Nutracheck suggests ingredients from the name. Tap the **circle** on the ones you're using and carry on from the top right. Or tap **Skip** and add your own.

CHECK THE AMOUNTS.

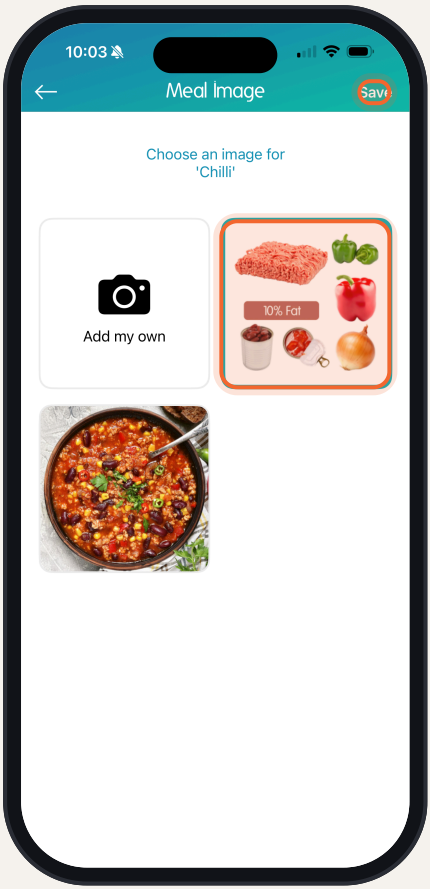

6 Search or scan anything that's missing. Change any amounts so they match what went in the pot. Your total and **1 serving** show at the bottom.

7 Tap **Save**.

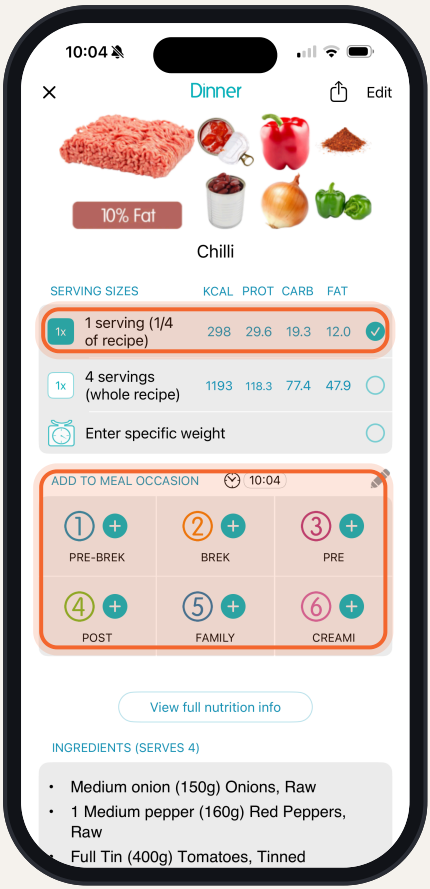

PICK A PICTURE.

8 Choose a picture for your recipe, or add your own, then tap **Save**.

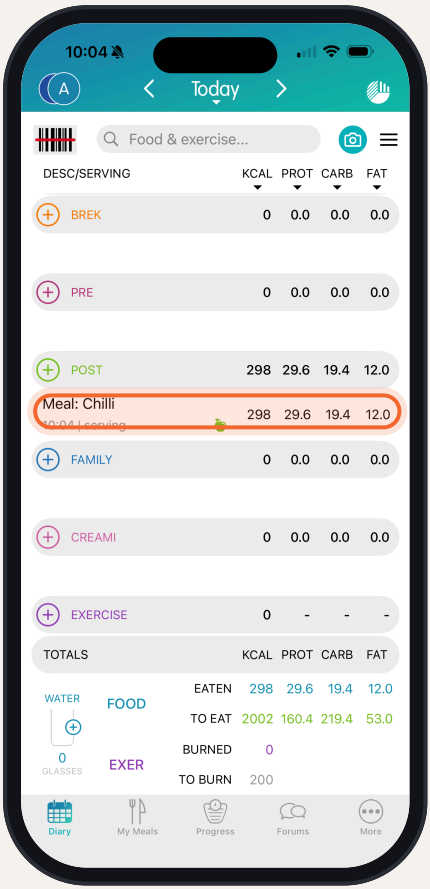

LOG YOUR RECIPE.

9 Make sure **1 serving** is ticked. Then tap the + on the meal you're having it with.

IT'S IN YOUR DIARY.

10 Done. Next time, find it in **My Meals** under the meal you saved it to.

RECIPE TIPS.

COUNT EVERYTHING

Oil, butter, sauces and cheese all go in. They're easy to forget and they add up fast.

DISH IT UP EVENLY

Servings only work if the portions match, so share the pot out evenly.

BOX UP THE REST

Freezing some for later? Same recipe, same log. One serving is one serving.

TELL YOUR COACH

Send them your family favourites. They can help you make them fit your targets.

GET IT RIGHT

LOGGING TIPS.

RAW OR COOKED?

Food changes weight when you cook it. Rice and pasta get heavier, meat gets lighter. The packet will say which one its numbers are for. Make your entry match how you weighed it.

CHECK IT AGAINST THE PACKET

If the numbers look odd, compare them with the label.

LOG IT BEFORE YOU EAT

Plan your day in the app in the morning. It stops the "oh go on then" extras creeping in.

LOG THE BAD DAYS TOO

They're the ones your coach most needs to see.

THAT'S IT

YOU'RE READY.

Log as you go. Log the bad days too.

Apps update and buttons move. If something in this guide isn't where we've said, message your coach on Trainerize and we'll sort you out.
